

Supplementary Terms and Conditions for optional services

April 2017

1. Supplementary agreement

These Supplementary Terms and Conditions apply to optional inclusive services which you can choose from when purchasing certain subscriptions, and are a supplement to the General Terms and Conditions for Telia Denmark's telephony services (business). In case of conflict, these Supplementary Terms and Conditions take precedence over the General Terms and Conditions.

2. Scope

Inclusive services costs DKK 0 unless stated otherwise. If the subscription does not include any services or these have been used up within a given billing period, the service may be purchased. In this case, the service will be payable in advance together with the subscription.

2.1 Extra Data Card

Extra Data Card is a service for a Telia subscription whereby the inclusive data volume can be split onto an extra data card. The extra data card can only be used for data and texts, and an additional 5 GB of data will accompany the extra data card each month, which can be used in the EU. Usage on extra SIM cards counts towards the Customer's total data usage, as it uses the Customer's data package. Both cards can be used at the same time.

2.2 Third-party services

The use of third-party services is subject to the conditions displayed on the provider's own web pages. Services require access to a data connection, and the data traffic used on a given service will count towards any inclusive data volume. See terms and conditions from Mondux insurance at the back of these T&C.

3. Notice of termination

Whether services are purchased or inclusive, they can be changed once a month, and the change will always take effect on the first of the month. There is thus also a minimum period of a month, after which the service can be terminated without notice (if it has been purchased) or replaced with another (if it is included in the subscription). If you have chosen a discount on your mobile as an optional service, this cannot be changed within the tie-in period. If you terminate the subscription, the inclusive services will cease. Some services require a data connection.
